**Subject:** Explanation of discrepance on NLP maps  
**Date:** Sunday, September 3, 2017 2:06:57 PM

---

The reason two counties were added to the NPL maps was due to a discrepancy in data reported between the FEMA website and state websites. The FEMA site is still reporting inaccurately for Louisiana.

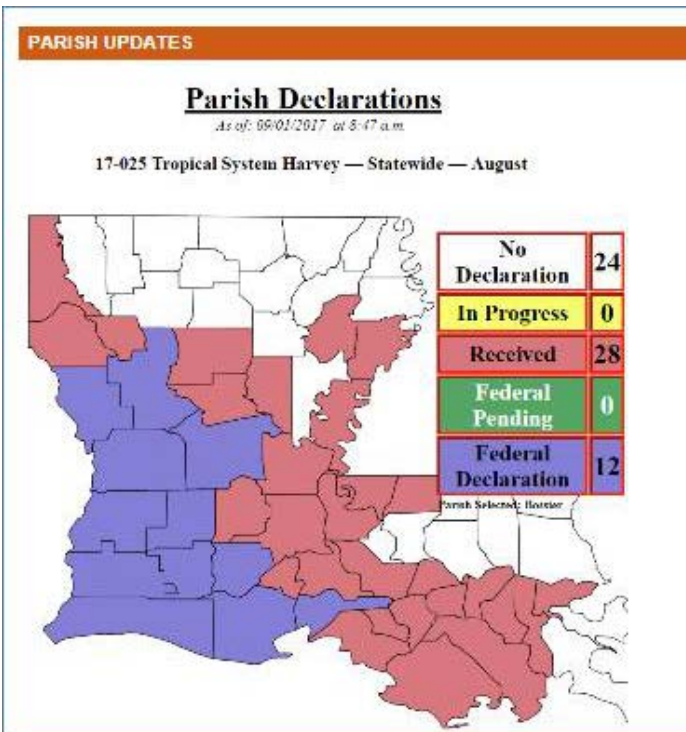

FEMA site: <https://www.fema.gov/disaster/3382/designated-areas>

## Designated Areas: Disaster 3382

**Individual Assistance**  
(Assistance to individuals and households)  
  
None

**Public Assistance**  
(Assistance to State, Local, Tribal and Territorial governments and certain private-non-profit organizations for emergency work and the repair or replacement of disaster-damaged facilities)  
  
**PA-B**  
Beauregard (Parish), Calcasieu (Parish), Cameron (Parish), Jefferson Davis (Parish), Vermillion (Parish)

LA EMA site: <http://emergency.louisiana.gov/>

Rapides County was added today. The discrepancy is evident if you compare the two sites. We use the designated counties to select the critical facilities which explains the NPL count changes for today and yesterday.

Thanks,

Lara
